Signage

Adding signage to a commercial bin offers several benefits that enhance both functionality and user experience. Signage clearly communicates the purpose of each bin, such as general waste, recycling, or organics, helping users quickly identify the correct bin for their waste as can be used to educate users about what materials are recycled or compostable, fostering a culture of sustainability.

Botton + Gardner designed options to better serve aesthetics and improve waste segregation with a stainless steel powder-coated screen enhancing the icons and defined lines available in small and large sizes.
